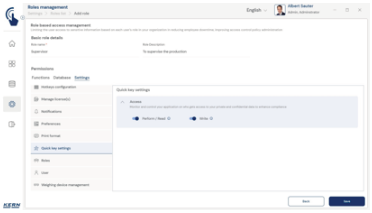
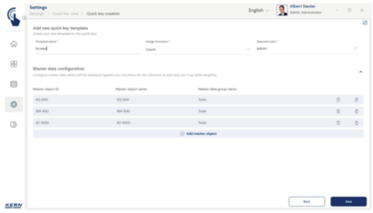
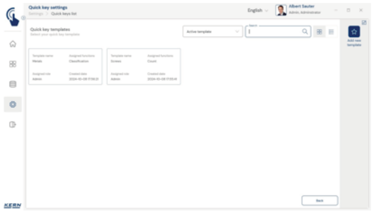
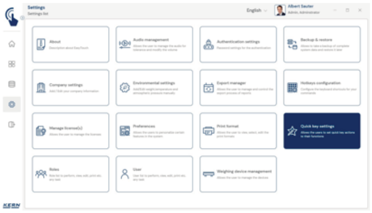
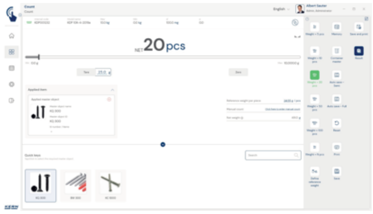
PRODUCT SHOWCASE











DESCRIPTION

- Note: Prerequisite for this set is the basic program SET-01 Base
- Quick Keys can be created in numerous sets, e. g.
  - SET-01 Base
  - SET-05 Dynamic
  - SET-06 Classification
  - SET-07 Variable
  - SET-08 Take Out
  - SET-31 Tolerance
  - SET-32 Count
  - SET-33 Target Count
- Quick selection keys for master data: Through ET Quick Keys, specific master data objects can be permanently displayed for quick selection. The Quick Keys are displayed on the screen immediately
- Saving: Whether selected in the conventional way or by using Quick Keys, every result of a weighing or piece count will be stored in relation to the selected master data object
- Selecting master data objects: The specific master data objects, which are displayed as Quick Keys, can either

be selected individually or as a defined master data group, which contains the master data as Quick Keys

- User-related: The Quick Keys can be created as a scheme which relates to particular user roles. This means that the users of a particular role are shown the relevant master data objects for quick selection. This allows, for example, different departments in the same company to work with different master data without overlapping
- Saving and printing: For each scheme you can set whether, in addition to the being saved, it should also be automatically printed out or not

SPECIFICATIONS

Article codes, product groups & Status information

Model article-code	SET-311
Model-Serie	ETS
Assortment	KERN
Product Type	Software
Product group	EasyTouch
Product usage type	Main item;Accessories/Services
EAN code (Model)	4045761486546
Customs tariff number	85234910
